It is very important to use correct bolts in attaching the back side of TV to upright rails (vertical bar). We strongly recommend taking measures to prevent the TV from toppling over. Unsecured TV may topple and result in property damage, serious bodily injury or even death.

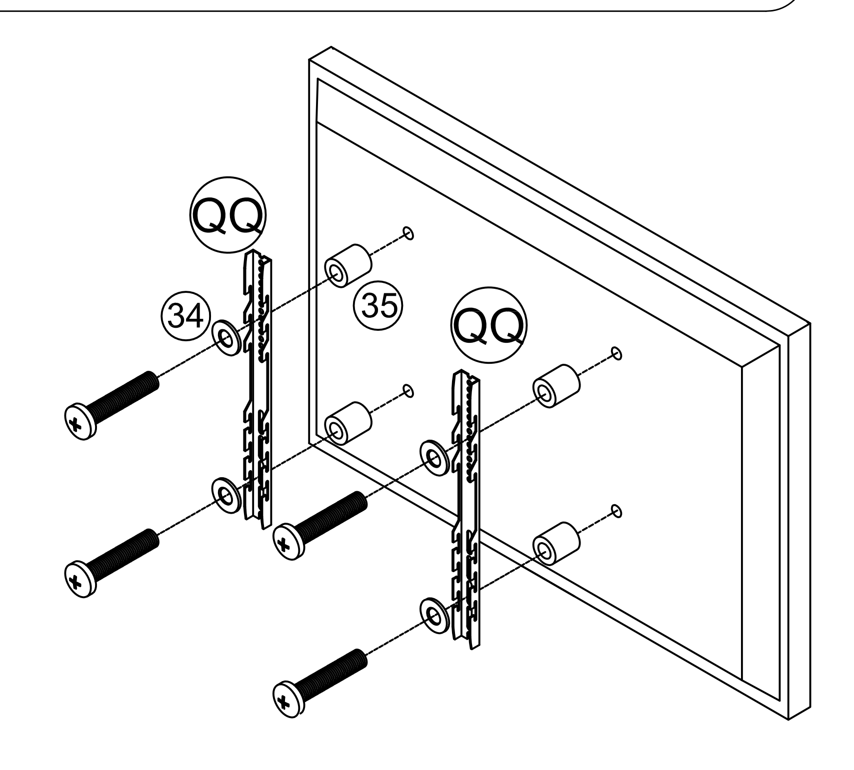

Be sure to use the bolts supplied with the TV when attaching upright rails to the TV set. If bolts are not provided, please follow the following steps:

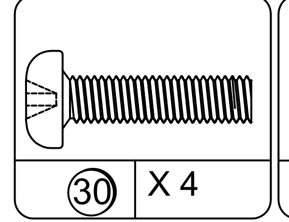

1. Please read Operating Instruction or Owner's Manual of your TV to determine the type and size of bolts. If you cannot find it, Please call your TV manufacturer for this information.

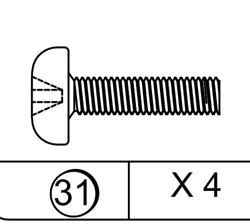

2. Altra Furniture has enclosed assortment of bolts, washers, and spacers in plastic bags that should work with most of TV sets. If you are unable to find correct bolts, please consult your local hardware store.

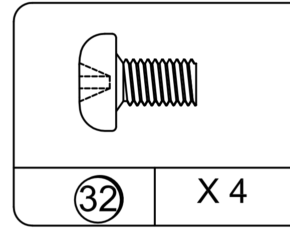

3. Be sure to use correct bolts (specified by the manufacturer) to attach your TV set to upright rails (vertical bars) as shown in the diagram.

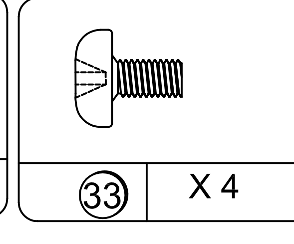

Note: Nylon spacers should be used if your TV set has recessed holes or an obstruction on the back that prevents it from sitting flush against the rails.
